

AlertRT Mass notification and real-time feedback

Be Prepared: Any Event, Any Emergency with AlertRT

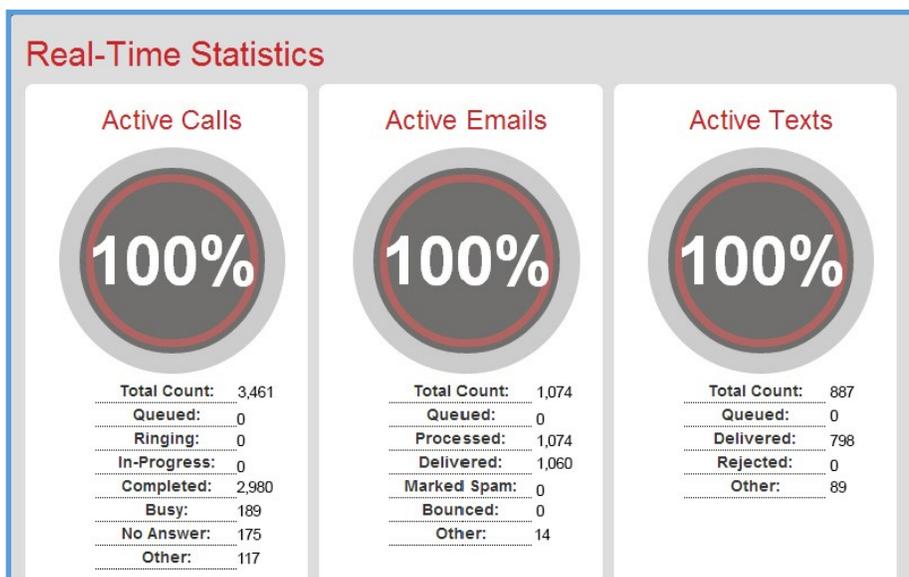

In our rapidly evolving world we face a multitude of natural and/or man-made threats that could strike at a moments notice. This creates new challenges to quickly disseminate and react to key information while keeping everyone informed in a accurate and timely manner.

AlertRT bridges that gap — providing your organization **instant notification + real-time, 2-way reporting** during critical events and threats. We can enable **universal communications** across virtually any platform or endpoint: Voice, SMS/Text, Email, Mobile Push, Desktop Push, Social Media. Two-Way communications can be enabled by leveraging our product with Microsoft Lync, Interactive Intelligence or by a fully customized bot.

AlertRT helps both public and private organizations be ready, without heavy capital investments.

- **Outbound Notification** via voice, email, SMS/Text, Mobile, Desktop and virtually any other endpoint including social media.
- **Inbound Interactive Voice Response (IVR) application** for employees to call for instructions and information pertaining to the event.
- **Easily Integrates with Active Directory**, existing personnel database, or flat data file.
- **Real-Time Statistics and Reporting** via Web App or Mobile Application
- **Alert by Any DIVISION or GROUPING you specify — Fully Customizable!**
- Conduct ad-hoc, instant conferences when you need them
- Carrier and facilities redundancy with virtually unlimited capacity
- Real-time web and mobile reporting and administration

AlertRT is available under Federal GSA Contract and New York State OGS Contract
